### Regulation (EC) No. 1907/2006 (REACH) – Article 33 (“Candidate List”)

Dear customer

On 1<sup>st</sup> June 2007 Regulation (EC) No 1907/2006 concerning the Registration, Authorization and Restriction of Chemicals<sup>1</sup> (“REACH” for short) came into force.

#### **REACH contains the following regulations:**

1. From 1<sup>st</sup> June 2008, manufacturers of substances, and importers of substances as such or of substances in preparations (mixtures) into the European Community (EC) and the European Economic Area (EEA), must register these substances with the European Chemicals Agency if the substances in question are manufactured or imported in quantities of at least 1 t/a<sup>2</sup> and if they are not substances that are exempted from compulsory registration. So-called “phase-in substances” – these are, for example, substances that are shown on the existing substances list EINECS – can be pre-registered between 1<sup>st</sup> June 2008 and 1<sup>st</sup> December 2008. Pre-registered substances do not have to be registered until later<sup>3</sup>, depending on the quantity manufactured/imported.
2. Suppliers of substances and preparations must provide the recipient with either a safety data sheet<sup>4</sup> or safety information<sup>5</sup>. In certain cases, the safety data sheet will be supplemented by an annex<sup>6</sup> (“extended safety data sheet”) showing the relevant exposure scenarios (including use and exposure categories where appropriate).
3. Manufacturers and importers of articles that are intended to release a substance under normal or reasonably foreseeable conditions of use must likewise register the substance concerned if its total content in the articles is more than 1 t/a<sup>7</sup>. For this purpose, the same registration periods apply as in the case of 1.
4. Manufacturers and importers of articles that contain more than 0.1 mass percent per article of a substance on the “candidate list” shall provide the professional recipient and on request a consumer of the article with sufficient information to allow safe use of the article, including, as a minimum, the name of that substance<sup>8</sup>.
5. From 1<sup>st</sup> June 2008 users of chemicals (substances and preparations/mixtures) – so-called “downstream users” – will have to comply with other obligations, but in some cases only after they have received an extended safety data sheet. Downstream users can provide appropriate information so as to assist the manufacturers of substances and importers of substances and preparations in registering them.<sup>9</sup>

AURORA manufactures articles that are generally not intended to release any substance under normal or reasonably foreseeable conditions of use. Thus, articles manufactured by AURORA do not pose any risk when used as intended.

Material Safety Data Sheets are only mandatory statutorily for certain substances and mixtures. Affected AURORA products are accompanied by appropriate Material Safety Data Sheets.

The candidate list (Substances of Very High Concern, 205 SVHC, dated 16<sup>th</sup> January 2020) according to article 59 (1, 10) of Regulation (EC) No 1907/2006 (“REACH”) has been published by ECHA (European Chemicals Agency, <https://echa.europa.eu/web/guest/candidate-list-table>).

<sup>1</sup> Regulation (EC) No. 1907/2006 of the EUROPEAN PARLIAMENT AND OF THE COUNCIL of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH), establishing a European Chemicals Agency, amending Directive 1999/45/EC and repealing Council Regulation (EEC) No 793/93 and Commission Regulation (EC) No 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/105/EC and 2000/21/EC.

<sup>2</sup> Article 6 of REACH

<sup>3</sup> Article 23 of REACH

<sup>4</sup> Article 31 (1) of REACH

<sup>5</sup> Article 32 of REACH

<sup>6</sup> Article 31 (7) of REACH

<sup>7</sup> Article 7 (1) of REACH

<sup>8</sup> Article 33 of REACH

<sup>9</sup> Article 37 of REACH

## LICHTWERKE

**As required by article 33 of REACH, AURORA will provide appropriate information to its customers if certain products or its packaging contain one or more of these SVHC in a concentration above 0.1% (weight) per article, as soon as we become aware of the fact.**

According to AURORA environmental sustainability policy it is our major concern to place on the market SVHC-free products for our customers, i.e. AURORA generally strives for obtaining SVHC-free components/products from its suppliers. However, some AURORA products might contain SVHC (e.g. lead) above the concentration level of 0.1% (weight) due to technical limitations, as to ensure their functionality over lifetime. AURORA is working together with its suppliers to substitute such substances in its products.

- AURORA products with Lithium batteries might contain 1, 2-dimethoxyethane, ethylene glycol dimethyl ether (EGDME) (CAS No. 110-71-4) more than 0.1% weight by weight of battery.
- Individual AURORA products that apply exemptions of Annex III, Directive 2011/65/EU (RoHS), including all amendments, concerning lead, contain articles with lead compounds resulting in lead (CAS No. 7439-92-1) concentration above 0.1% by weight of article.
- AURORA signal lamps for railway applications (Low-voltage over-pressure single/dual coil lamps) as well as silicone-based articles or mixtures, respectively, might contain Octamethylcyclotetrasiloxane (D4) (CAS No. 556-67-2), Decamethylcyclopentasiloxane (D5) (CAS NO. 541-02-6) or Dodecamethylcyclohexasiloxane (D6) (CAS NO. 540-97-6) with concentration above 0.1% by weight of article.

To our current knowledge, our products do not contain other SVHC in a concentration above 0.1% by weight of article.
